

Hello, I'm Colt Pini.

I design and develop web applications and sites and have been for over 13 years. I love JS and the rest of the open web stack. I have led teams of designers and developers in building small and large products that support over 130 languages and millions of users.

Founder

Luce Studio / 2015-Present

- Developing product strategy and long term vision for Luce Studio.
- Building and designing Identity systems, style guides, pattern libraries, component systems and marketing materials for the core organization and each project.
- Architecting and building core products, including learning software and CMS and Media solutions.

Lead Front-end Developer / Architect

Orvis / 2018-2019

- Architected solutions to integrate a new CMS to a front end framework for a brand new e-commerce site.
- Started the front end discipline at Orvis by building a strong team of developers through hiring, training and establishing best practices.
- Worked with the design team to create a living component system to increase pattern / code reuse, reduce development time, reduce maintenance, and speed up the website over 950%.

Sr. Front-end Developer

GitHub / 2017-2018

- Led an effort to create a web based code editor delving into indexedDB.
- Shipped quickly and efficiently breaking down the application to chunks that could be shipped every few days.

Web Development Manager / Principle Ux Designer

The Church of Jesus Christ of Latter-day Saints / 2011-2017

- Created a system of sharing web components that dropped development time from months to hours.
- Created and trained best practices and standards resulting in stronger more maintainable code, and better cross team collaboration.
- Assessed new technology and architected solutions that could drive down maintenance and development cost that included investigation and use of React / Redux and Native Web Components.

DEVELOPMENT

Javascript, HTML, & CSS
Web Components
Node.js
React / Angular
Gulp, Webpack, ES6 modules
MongoDB
Postgre

DESIGN

User Experience
Interaction Design
Internationalization
Accessibility
Usability
User Research
Information Architecture

MANAGEMENT

Recruiting
Standards & best practices
Agile and kanban
